

Thermal Edge Inc.™

Air Conditioner Options

REMOTE CONTROLLER OPTION (Bx)

When having our Programmable Digital Controller on the face of our Air Conditioner does not fit your application, Thermal Edge offers the Remote Controller Option.

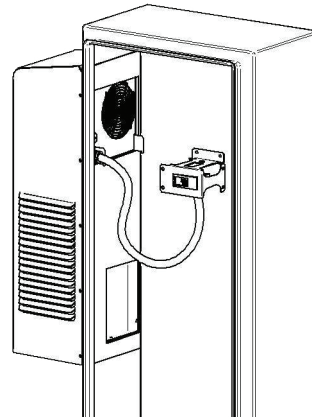

This option moves the controller into your enclosure using an 10' cable along with a 16 gauge powder coated steel universal mounting bracket, creating limited access to the controller for secure applications. As shown below, the air conditioner has no openings on the face of the unit.

In addition, the Remote Controller Option and a filter hood or louvered cover option are required for high pressure wash-down applications.
